

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair! :)

I am a middle school student and I make enough money to pay my wireless service from babysitting and I won't be able to pay the taxes, so I will have to get rid of my phone. Wouldn't it be better If I had money to pay the taxes, so I just kept my phone. With the taxes, you would be making nothing from me. With out the taxes, even though it may seem smaller, you would be making more from me. Isn't that better. I need your help, so help me!!!!!!!!!!

Sincerely,

Audrey Cantgiveaway
